Running title: Historical Rules and Peak Limits.

Main-text narrative word count: 4,142.

Excludes the abstract, citations and references, declarations, tables and figures (including captions), and displayed equations; uses the frozen narrative-count definition.

Keywords: Peak net positions; Quantile forecasting; Historical benchmarks; Forecast comparison; Calibration.

Data and code: Source rights, excluded raw inputs and reproduction information are stated in the manuscript and the versioned repository.

Data permissions and license compliance: [TO BE VERIFIED BY AUTHOR].
